Preferred Supplier:

**BAY AREA**  
**BLUESTONE**  
ARCHITECTURAL • INTERIOR • LANDSCAPE

## One Stone, Many Uses

Bluestone is one of the most versatile stones used in landscape construction. We love using bluestone in our projects because it combines the beautiful natural tones and texture of the stone with a durability that is suited to a variety of installation needs.

Bluestone is ideal for landscape projects because it is available in a wide variety of shapes, sizes and treatments- irregular slabs of various sizes and thicknesses and precut pieces that fit well with most design styles.

### Colors:

Bluestone works well with most color schemes. It is available in blues and grays (select blue), or in a wider range of browns, purples, blues and greens (full range).

### Applications:

It is well suited for wall caps, patios, pool coping, countertops, flagstone pathways and just about any other paving or decorative application.
